MAIL DATE

DELIVERY MODE

10/28/2008

PAPER

**Please find below and/or attached an Office communication concerning this application or proceeding.**

The time period for reply, if any, is set in the attached communication.

<b>Office Action Summary</b>	<b>Application No.</b> 10/762,523	<b>Applicant(s)</b> LEE ET AL.	
	<b>Examiner</b> NIRAV PATEL	<b>Art Unit</b> 2435	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

- 1) ☒ Responsive to communication(s) filed on 12 August 2008 (RCE).
- 2a) ☐ This action is **FINAL**.                      2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

### Disposition of Claims

- 4) ☒ Claim(s) 1-5 and 7-33 is/are pending in the application.
- 4a) Of the above claim(s) \_\_\_\_\_ is/are withdrawn from consideration.
- 5) ☐ Claim(s) \_\_\_\_\_ is/are allowed.
- 6) ☒ Claim(s) 1-5 and 7-33 is/are rejected.
- 7) ☐ Claim(s) \_\_\_\_\_ is/are objected to.
- 8) ☐ Claim(s) \_\_\_\_\_ are subject to restriction and/or election requirement.

### Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on \_\_\_\_\_ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.  
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).  
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

### Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All    b) ☐ Some \*    c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
  2. ☐ Certified copies of the priority documents have been received in Application No. \_\_\_\_\_.
  3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

\* See the attached detailed Office action for a list of the certified copies not received.

### DETAILED ACTION

1. Applicant's submission for RCE filed on Aug. 12, 2008 has been entered. Claims 1-5, 7-33 are pending.

### Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-4, 7-12, 16-20, 22-28, 32 are rejected under 35 U.S.C. 103(a) as being unpatentable over Lambert (US Pub. No. 2004/0044779) in view of Safadi (US Pub. No. 2003/0126086) in view of Russ et al (US Patent No. 6,748,080) and in view of Hans et al (US Patent No. 7,200,575).

As per claim 1, Lambert teaches: a server, wherein if the server receives multimedia contents from one of a plurality of DRM server groups having a unique DRM solution respectively, the server performs communication relating to services with the corresponding DRM server group according to the DRM solution of the received multimedia contents [Fig. 7, 4], wherein the server comprises a plurality of managers constructed according to DRM server groups [Fig. 7, 4, associated text]. Further, Lambert teaches a platform authentication unit operable to request a license for

Art Unit: 2435

multimedia contents from a corresponding DRM server group which provides the multimedia content [Fig. 4, 7, paragraph 0135, 0136, Fig. 8, 9].

Safadi teaches converts the received multimedia contents into multimedia contents having a format suitable for at least one client of the intranet and transmits the converted multimedia contents to the client [Fig. 1, paragraph 0017, 0021, 0023, 0026, 0028]. Further, Safadi teaches: the server comprises the proxy manager, wherein the proxy manager comprises a content conversion unit for converting the multimedia content into contents having a format suitable for the client [paragraph 0017, 0024]; a license translation unit operable to translate a license received from the corresponding DRM server group into a license having a format suitable for the client [Fig. 1 paragraph 0023, 0026].

Therefore, it would have been obvious to a person of ordinary skill in the art at the time the invention was made to combine Safadi with Lambert, since one would have been motivated to prevent illegal copying and provide copy protection of content provided over a digital communication network [Safadi, paragraph 0001, 0003].

Russ teaches:

a content conversion unit operable to decrypt multimedia contents received from the corresponding DRM server group, and converting the decrypted multimedia contents into multimedia contents having a format suitable for the client; and a license translation unit operable to translate a license received from the corresponding DRM server group into a license having a format suitable for the client [col. 3, 7, col. 15, lines 34-44, col. 21 lines 21-65].

Art Unit: 2435

Therefore, it would have been obvious to a person of ordinary skill in the art at the time the invention was made to combine Russ with Lambert and Safadi, since one would have been motivated to provide security and control concerns for the operators of the subscriber network system [Russ, col. 2 lines 11-13].

Hans teaches: performing registration of the client [Fig. 4 col. 5 lines 60-67].

Therefore, it would have been obvious to a person of ordinary skill in the art at the time the invention was made to combine Hans with Lambert, Safadi and Russ, since one would have been motivated to manage the access to the digital content and control the distribution of digital content [Hans, col. 1 lines 6-7, 48-49].

As per claim 2, the rejection of claim 1 is incorporated and Russ teaches the converted multimedia contents are encrypted and transmitted to the client [Fig. 3, col. 16 lines 9-13, 64-67, col. 17 lines 1-7].

As per claim 3, the rejection of claim 1 is incorporated and Russ teaches:

the server translates a license received through the Internet to be suitable for the client of the intranet and additionally transmits the translated license to the client [Fig. 3, 7, col. 21 lines 21-65].

As per claim 4, the rejection of claim 3 is incorporated and Russ teaches:

the translated license is encrypted and transmitted to the client [Fig. 3, 7, col. 21 lines 21-65].

Art Unit: 2435

As per claim 7, the rejection of claim 3 is incorporated and Hans teaches:

a report/billing unit operable to arrange multimedia content usage details of the client, and to transmit the arranged multimedia content usage details to the DRM server group, and to transmit information relating to billing [Fig. 3, 4, 5].

As per claim 8, it encompasses limitations that are similar to limitations of claim 1. Thus, it is rejected with the same rationale applied against claim 1 above.

As per claim 9, the rejection of claim 8 is incorporated and it encompasses limitations that are similar to limitations of claim 2. Thus, it is rejected with the same rationale applied against claim 2 above.

As per claim 10, the rejection of claim 9 is incorporated and it encompasses limitations that are similar to limitations of claim 3. Thus, it is rejected with the same rationale applied against claim 3 above.

As per claim 11, the rejection of claim 10 is incorporated and it encompasses limitations that are similar to limitations of claim 4. Thus, it is rejected with the same rationale applied against claim 4 above.

As per claim 12, the rejection of claim 11 is incorporated and Russ teaches:

Art Unit: 2435

a content decryption unit operable to decrypt the multimedia contents which are encrypted and transmitted; and a rights management unit operable to decrypt the license which is encrypted and transmitted, and to check whether the decrypted multimedia contents are executed in the client to be suitable for the decrypted license [Fig. 9 col. 16-67].

Hans teaches: an authentication and access control unit operable to perform registration of the client on the server and access to the server [Fig. 4, 5].

As per claim 16, the rejection of claim 12 is incorporated and Hans teaches:

a report unit for reporting usage details of the transmitted multimedia contents to the server [Fig. 3-5].

As per claim 17, it encompasses limitations that are similar to limitations of claim 1.

Thus, it is rejected with the same rationale applied against claim 1 above.

As per claim 18, the rejection of claim 17 is incorporated and it encompasses limitations that are similar to limitations of claim 2. Thus, it is rejected with the same rationale applied against claim 2 above.

As per claim 19, the rejection of claim 17 is incorporated and it encompasses limitations that are similar to limitations of claim 3. Thus, it is rejected with the same rationale applied against claim 3 above.

Art Unit: 2435

As per claim 20, the rejection of claim 19 is incorporated and it encompasses limitations that are similar to limitations of claim 4. Thus, it is rejected with the same rationale applied against claim 4 above.

As per claim 22, the rejection of claim 17 is incorporated and it encompasses limitations that are similar to limitations of claim 7. Thus, it is rejected with the same rationale applied against claim 7 above.

As per claim 23, the rejection of claim 22 is incorporated and it encompasses limitations that are similar to limitations of claim 7. Thus, it is rejected with the same rationale applied against claim 7 above.

As per claim 24, it encompasses limitations that are similar to limitations of claim 1. Thus, it is rejected with the same rationale applied against claim 1 above.

As per claim 25, the rejection of claim 24 is incorporated and it encompasses limitations that are similar to limitations of claim 2. Thus, it is rejected with the same rationale applied against claim 2 above.

Art Unit: 2435

As per claim 26, the rejection of claim 25 is incorporated and it encompasses limitations that are similar to limitations of claim 3. Thus, it is rejected with the same rationale applied against claim 3 above.

As per claim 27, the rejection of claim 26 is incorporated and it encompasses limitations that are similar to limitations of claim 4. Thus, it is rejected with the same rationale applied against claim 4 above.

As per claim 28, the rejection of claim 27 is incorporated and it encompasses limitations that are similar to limitations of claim 12. Thus, it is rejected with the same rationale applied against claim 12 above.

As per claim 32, the rejection of claim 28 is incorporated and it encompasses limitations that are similar to limitations of claim 16. Thus, it is rejected with the same rationale applied against claim 16 above.

3. Claims 5, 13-15, 21, 29-31, 33 are rejected under 35 U.S.C. 103(a) as being unpatentable over Lambert (US Pub. No. 2004/0044779) in view of Safadi (US Pub. No. 2003/0126086) in view of Russ et al (US Patent No. 6,748,080) in view of Hans et al (US Patent No. 7,200,575) and in view of Fransdonk (US Patent No. 7,228,427).

Art Unit: 2435

As per claim 5, the rejection of claim 2 or 4 is incorporated and Russ teaches the encryption is performed using a key [col. 20 lines 11-20].

Fransdonk teaches the encryption is performed using a group key of the server [Fig. 2, col. 17 lines 49-50].

Therefore, it would have been obvious to a person of ordinary skill in the art at the time the invention was made to combine Fransdonk with Lambert, Safadi, Russ and Hans, since one would have been motivated to distribute and deliver the content via a communication network securely [Fransdonk, col. 1 lines 30-32].

As per claim 13, the rejection of claim 12 is incorporated and Russ teaches the encryption is performed using a key [col. 20 lines 11-20].

Fransdonk teaches the encryption is performed using a group key of the server [Fig. 2, col. 17 lines 49-50].

As per claim 14, the rejection of claim 12 is incorporated and it encompasses limitations that are similar to limitations of claim 13. Thus, it is rejected with the same rationale applied against claim 13 above.

As per claim 15, the rejection of claim 13 or 14 is incorporated and Fransdonk teaches the decryption is performed using a client key corresponding to the group key of the server [Fig. 2, col. 17 lines 49-50].

Art Unit: 2435

As per claim 21, the rejection of claim 18 or 20 is incorporated and it encompasses limitations that are similar to limitations of claim 5. Thus, it is rejected with the same rationale applied against claim 5 above.

As per claim 29, the rejection of claim 28 is incorporated and Russ teaches the encryption is performed using a key [col. 20 lines 11-20].

Fransdonk teaches the encryption is performed using a group key of the server [Fig. 2, col. 17 lines 49-50].

As per claim 30, the rejection of claim 28 is incorporated and it encompasses limitations that are similar to limitations of claim 14. Thus, it is rejected with the same rationale applied against claim 14 above.

As per claim 31, the rejection of claim 29 or 30 is incorporated and it encompasses limitations that are similar to limitations of claim 15. Thus, it is rejected with the same rationale applied against claim 15 above.

As per claim 33, the rejection of claim 15 is incorporated and Hans teaches said client key is assigned to register DRM smart clients through the platform authentication and access control unit [Fig. 3, 5].

### **Response to Amendment**

4. Applicant has amended claims 1, 8, 17, 24 which necessitated new ground of rejection. See new ground of rejection above.

### **Conclusion**

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Mighdoll et al (US 6311207) – Method of using electronic tickets containing privileges for improved security
